The new mosquito genomics

New design, new features, same unrivalled low-volume performance and versatility

Our mosquito genomics has been the popular choice for NGS labs and core facilities wanting to miniaturise reaction volumes and maximise productivity. Now we are making your favourite pipetting robot even better. mosquito genomics is available with a host of new and exciting features and upgrades:

new ergonomic design features

new cooling block
to protect sample
and reagent integrity

protocol wizards
for fast and easy set-up

new magnetic plate
for reliable miniaturised
SPRI bead clean-ups
